Impact Fees

- Work on this project is proceeding on schedule. At the June 21st meeting of the Mayor and City Council the Draft Assessment Report was presented and a resolution passed by the Council to accept the report and advertise for a public hearing at the July 19th meeting. The public hearing was conducted and the draft Capital Improvements Element has been forwarded to the Department of Community Affairs. Final recommendations will come in late summer after the review by DCA.

Ashton Woods/Mercedes Project Review

- Staff continues to review the Land Disturbance Permit for the Ashton Woods/ Mercedes project. There are two engineers working on the south side portion of the project and a third engineer working on the road designs. Staff continues to meet with the design teams and owners in formal meetings every two weeks to try to assist with their coordination and communication issues with each other. In addition staff has met with the design team numerous times throughout the past several weeks to assist with basic design questions. In spite of challenges staff was able to issue a limited land disturbance permit for erosion and sediment control work to the Mercedes project and a full land disturbance permit to the Ashton Woods development on the north side of Abernathy Road. Work continues on both of these sections but approvals have not moved much closer to completion since the issuance of the two phase one permits.
